

School Development Road Map - 2024-25

Our school development roadmap outlines key priorities for school improvement, focusing on leadership and management, behaviour and attitudes, personal development, early years provision, quality of education and parental engagement.

Leadership and Management

Our senior leaders are focusing on improving their skills to lead the school effectively and ensure every child succeeds.

Personal Development

Strengthen children's understanding of the fundamental British values of democracy, individual liberty, the rule of law, and mutual respect and tolerance.

Quality of Education

We aim to ensure that children's achievements in reading, writing, and maths match or exceed the national standards.

Behaviour and Attitudes

We are working to make sure all children attend school regularly and on time, as every school day is important for learning and development

Early Years Provision

All children to achieve or exceed the expected outcomes in the Early Years Foundation Stage Profile through an engaging, inclusive, and well-resourced curriculum that meets the diverse needs of all learners.

Parental Engagement

We want to work more closely with parents and carers to support children's learning and development.
